1. A hallmark of learning astrology is to know life from horoscopes but also imagine the horoscope when you get to know a person deeply.

Design the hypothetical horoscope of Gabbar Singh (character in the film Sholay). He was a dacoit, spent his time in jails, was delusional, alcoholic, but was a leader by example. (Write to the coach if you haven't seen Sholay, he will change the case study for you).

2. We did a chart in our RPP#5 and discussed conditions around the person committing suicide at an early age (Ju Mahadasha - Ju Bhukti).

A person (in his mid 30s, born in 1986) “X” came to the coach with a similar chart (below) as that chart we discussed in RPP#5. “X” didn’t commit suicide but had a jerky experience in his 20s. What is the difference between this chart and the one you saw in RPP#5? Give reasons.

4. Jyotishis are Tantriks but Car mechanics are not. Cooks in the kitchen are Tantriks but not gardeners. Fund managers in Wall Street are Tantriks but not retail bank managers. Expand on the above, and give a small (3-5 lines) commentary.

5. A person works at a big credit card company and handles analytics. He finds that his wife was cheating on him and gets divorced. After which, he is not able to perform well in his work and makes bad calculations in his excel spreadsheets at work. Sometimes he is not able to even wake up and show up at the office. To cope up, he starts drugs (marijuana) and this helps him forget his pain but one day he makes a blunder in work that led to customers who paid credit card bills on time being sent a "late fee penalty notice". He is fired from his job, and he sinks into depression.

Translate this problem into the language of astrology. One crucial skill that any great astrologer must possess is to translate grahas-in-horoscopes into life-situations and vice versa.

अब चार योग बताते हैं। इन चारों योगों का विचार चन्द्र राशि से किया जाता है। इन चारों योगों में जहां ग्रह का उल्लेख किया जावे वहां मंगल, बुध, बृहस्पति, शुक्र और शनि केवल इन पांच ग्रहों को समझना चाहिये। सूर्य की गणना इनमें नहीं करनी चाहिये :—यदि चन्द्रमा से द्वादश में कोई ग्रह हो और द्वितीय में कोई ग्रह नहीं हो तो अनफा योग होता है। यदि चन्द्रमा से द्वादश में कोई ग्रह न हो और केवल द्वितीय में हो तो सुनफा योग होता है। यदि चन्द्रमा से द्वितीय और द्वादश दोनों स्थानों में ग्रह हों तो दुरुधुरा योग होता है। यदि चन्द्रमा से द्वितीय और द्वादश में—दोनों स्थानों से किसी में भी कोई ग्रह न हो तो केमद्रुम योग होता है। कुछ लोगों का मत है कि निम्नलिखित योगों में से कोई हो तो केमद्रुम योग नहीं होता।

- (१) यदि चन्द्रमा के साथ कोई ग्रह हो।
- (२) यदि लग्न से केन्द्र में कोई ग्रह हो।
- (३) यदि चन्द्रमा से केन्द्र में कोई ग्रह हो।

मन्त्रेश्वर महाराज ने यह लिखकर कि कुछ अन्य लोगों का मत

* जन्म कुंडली में जिस राशि में चन्द्रमा हो उसे चन्द्र राशि या चन्द्र लग्न कहते हैं।
